DataAnalysisController

• 新增三个接口

接口1

返回示例:

```
"msg": "success",
"code": 0,
"data": [
  {
    "countryEn": "China",
    "yearJc": 2016,
    "\delta13C": -27.28,
    "\delta2H": -68.4373,
    "dataFrom": "黑龙江农业科学院",
    "\delta32W": null,
    "δ32S": null,
    "\delta110": null,
    "species": "大米",
    "cityEn": "Haerbinshi",
    "\delta15N": 5.7381,
    "δ8X": null,
```

接口2

getTwoTargetData(String target1, String target2)

 $url=/agriculture/ag/dataAnalysis/getTwoTargetData?target1=\delta 32S\&target2=\delta 15N$ 返回示例:

```
"msg": "success",
"code": 0,
"data": [
  22.33,
    5.243
  ],
  3.235,
    5.243
  ],
  Γ
    3.356,
    5.243
  ],
  [
```

接口3

```
getMoreTargetData(String[] targets)
```

 $url=/agriculture/ag/dataAnalysis/getTwoTargetData?targets=\delta 32S,\delta 15N,\delta 22N,\delta 15P$ 这里传进来的必须是偶数个指标,且数量在2~8之间

返回示例:

```
1
      "msg": "success",
2
       "code": 0,
3
4
       "data": [
          [
5
6
                22.33,
7
                5.243
8
9
              ],
10
              3.235,
11
12
13
              ],
14
              3.356,
15
                5.243
16
17
              ],
18
              [
                44.43,
19
               5.243
20
21
              ],
```
